Insert pg 2 Testing of Donor Blood:

Blood components collected between December 3, 2018 and July 16, 2021 were tested with a licensed nucleic acid test (NAT) for Zika Virus RNA and found to be nonreactive.

APHERESIS PLATELETS LEUKOCYTES REDUCED, COLD STORED CSP are intended for the treatment of active bleeding when conventional platelets are not available, or their use is not practical. CSP must be stored continuously at 1-6°C to control the risk of bacterial contamination for up to 14 days. Transfusion services should establish procedures for examining CSP for visible aggregates before transfusion.
